## HARDWARIO Launches New Website and Expands Its CHESTER Product Family

**HARDWARIO (HWIO.PR), a pioneer in industrial IoT solutions, is pleased to announce the launch of a new website. It has been designed to communicate an overview of HARDWARIO's solutions to visitors in a clear way, while offering deeper insights into the product portfolio.**

At the heart of this activity is the expansion of the CHESTER hardware IoT platform product line, designed to easily connect industry with smart technologies. The new product line promises to revolutionize business operations, streamlining processes and opening the way to smarter practices.

### CHESTER-U1: A Breakthrough for Integrators

Following the success of the CHESTER platform, HARDWARIO has recently expanded its product line with the introduction of the CHESTER-U1 integrator module. This smaller version, specifically designed for OEM integrators, features compact dimensions of just 38.1 × 38.1 mm.

The new variant maintains full hardware and software ecosystem compatibility with the existing CHESTER range.

But it's not just the compactness of the solution that attracts attention. The pricing structure of the CHESTER-U1, especially for volume orders, offers integrators unbeatable price advantages. By lowering the entry costs for these cutting-edge technologies, HARDWARIO wants to increase the deployment of the CHESTER platform in various sectors and thus strengthen its market position.

## Successful IoT Monitoring Deployment With KYOCERA AVX

In addition to its product innovations, HARDWARIO is pleased to share the successful deployment of its IoT solution for monitoring production machines and workstations at KYOCERA AVX's premises in Lanškroun. This collaboration is a testament to the practical applications and real benefits of HARDWARIO's IoT solution.

The seamless integration of their products into KYOCERA AVX operations demonstrates not only the flexibility of HARDWARIO solutions, but also their transformational impact on industrial production lines.

### About HARDWARIO

HARDWARIO a.s. is a Czech technology company focused on IoT – Internet of Things. It provides its customers with configurable IoT devices, connectivity and cloud services. Together with its partners, it successfully implements IoT projects in manufacturing, energy, agriculture, retail, healthcare and asset management.

More detailed information can be found at [www.hardwario.com](http://www.hardwario.com).
